

Woodsmith™

Hand crafted
Tasmanian Oak Engineered Flooring
from nature's finest timber

Sustainably crafting beautiful Regrowth Tasmanian Oak products since 1924.

Neville Smith Forest Products (NSFP) has been part of Tasmanian forestry since 1924, and today is one of the most advanced processors of sustainably grown Regrowth Tasmanian Oak products in Australia.

With a long and proud history working in Tasmania's forest industry we understand the importance of sustainably managing this beautiful and unique resource.

Woodsmith Engineered Flooring is sourced from only sustainably harvested, regrowth PEFC Certified Tasmanian Oak and all NSFP sites have 100% Chain of Custody certification.

When you choose NSFP timber products, you can be assured of a beautiful and natural product that has been sourced using the highest environmental standards.

Handcrafted from the finest sustainably harvested hardwood Tasmanian Oak, our engineered flooring begins its life in Tasmania's arresting mountain ranges, before being planed, sanded and meticulously finished. The resource-rich, fertile environment, abundant clean air and reliable rainfall ensure a pure and consistent natural product.

A sustainable and local timber

The regrowth eucalypt hardwood possesses a rare natural beauty, is expertly milled, ensuring waste is minimised and the yield maximised.

An innovative product with a consistent grain

The straight, consistent grain and 165mm flooring profile creates a sense of expansiveness and organic flow for a myriad of interior applications. Quarter sawing ensures a smooth, uninterrupted visual continuity. Due to the layered construction of the flooring it is stable, flexible, resistant to warping and shrinkage, and suitable for domestic and commercial applications.

Woodsmith's Tasmanian Oak engineered flooring is highly receptive to staining, resulting in a wide range of refined, contemporary colours. State of the art production techniques ensure a product that is hard wearing, highly resistant to foot traffic and every day living.

Our original, handcrafted flooring is the perfect designer choice for premium decorative themes and project choices.

Bona®

All coated Woodsmith Engineered Flooring Products are finished using the industry leading Bona Naturale UV system.

Bona Naturale UV is the next generation of timber floor finishes and provides a natural looking and feeling alternative to traditional floor treatments such as polyurethane or waxes. This exceptional product has captured the imaginations of architects, designers and design-conscious home owners worldwide.

What is so special about Woodsmith engineered floors treated with Bona Naturale is that it preserves the true nature of the timber floor while giving it durable protection against scratches and stains. It provides virtually maintenance free protection on par with traditional high end finishes, while keeping the natural look and feel to the floor that was previously only possible with oil or wax. Bona Naturale UV is almost VOC free, making it completely safe for young children.

Spot repairs are also possible with Bona Naturale UV, enabling you to deal swiftly and efficiently with any minor damage or scratches throughout the life of the floor.

Bona Naturale UV.

- A UV finish that provides a natural look & feel.
- Appeals to style conscious home owners.
- Provides full wear, scratch and chemical resistant properties.
- Has very low maintenance requirements.
- Ultra low VOCs.
- Allows for seamless spot repairs.
- For more information on Bona Naturale please visit bona.com/naturale
